DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 and 5-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vogel '227 in view of Frazzell et al. '389.

Referring to claims 1-3 and 5-10, Vogel discloses a wrench, comprising: a first engagement end having a first engagement region, a body positioned adjacent to the first engagement end, the body incorporating a reflective material, and a second engagement end having a second engagement region, the second engagement end positioned adjacent to the body and opposite the first engagement end; the reflective material is reflective and luminescent. Vogel does not specifically disclose that the wrench is buoyant and having a specific gravity of less than 1.0. Frazzell et al. discloses a buoyant wrench having a specific gravity of less than 1.0 so that it would float in water. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have made the wrench of Vogel to have a specific gravity of less than 1.0 as taught by Frazzell et al. so that it would float in water.

Referring to claim 11, Vogel as modified discloses a method for forming a buoyant wrench including the steps of: positioning an engagement end having an engagement region adjacent to a body; and incorporating a reflective material in the body.

Response to Arguments

1. Applicant's arguments filed 10/18/04 have been fully considered but they are not persuasive. In response to Applicant's argument that there is no suggestion to combine the references, the Examiner recognizes that references cannot be arbitrarily combined and that there must be some reason why one

Art Unit: 3723

skilled in the art would be motivated to make the proposed combination of primary and secondary references. In re Nomiya, 184 USPQ (CCPA 1975). However, there is no requirement that a motivation to make the modification be expressly articulated. The test for combining references is that the combination of disclosures taken as a whole would suggest to one of ordinary skill in the art. In re McLaughlin, 170 USPQ 209 (CCPA 1971). References are evaluated by what they suggest to one versed in the art, rather than by their specific disclosures. In re Bozek, 163 USPQ 545 (CCPA 1969). In this case, Frazzel teaches that the wrench of Vogel can be made buoyant.

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
